- ▷ Sprains
- ▷ Strains
- ▷ Traumas
- ▷ Tendonitis
- ▷ Ulcers
- ▷ Wounds

MLS[®] Laser Therapy: why?

To be active again.

Thanks to MLS[®] Laser Therapy devices, the patient can quickly overcome the acute phase of pain with long-lasting results, finding a better quality of life and coming back in a short time to the normal activities of everyday life such as work, sports and social life. In fact the MLS[®] Laser Therapy not only can help to overcome the painful symptoms typical of the musculoskeletal system, but also represents a valuable tool for rehabilitation, as it effectively promotes the recovery of the functions that were compromised by surgery or fractures.

In a rapid and successful way.

- ▷ FAST TREATMENT TIMES
from 3 to 10 minutes.
- ▷ REDUCED NUMBER OF APPLICATIONS
in many patients the benefits are evident since the first application and scientific studies have shown that between the fourth and fifth application the pain subsides by at least 50%, with recovery of joint functions.
- ▷ SIMULTANEOUS ACTION
on the pain-inflammation-edema triad.

To overcome the limits of traditional Laser Therapy.
